

### M&A Life Sciences Professional – Principal (Associate / Senior Analyst)

We are seeking to grow our team with a Principal with life sciences transactions background. TransAct Advisory Services ([www.transactadvisory.com](http://www.transactadvisory.com)) is a leading Europe based small to mid-cap transactions advisory firm focused on the life sciences and related technologies sectors.

#### Your Primary Responsibilities:

- Process management and support of life sciences / technologies transaction assignments (e.g. M&A, licensing, corporate finance)
- Financial and business analysis and modelling
- Presentations for clients, boards or committees
- Support throughout the entire transactions advice process (from pitch presentations to transaction closure)
- Developing and building client relationships

#### Your Qualifications:

- Transactions work experience (at least one year) in M&A and licensing for a corporate finance / strategy consulting, M&A advisory, life sciences enterprise
- Biosciences and/or medical background ideally in combination with MBA (or comparable)
- Ability and wish to work independently / autonomously from a home office or co-working environment
- Fluent in English (a must) and ideally German
- Excellent Excel and Power Point (presentations) skills
- You live in the European Union or Switzerland, Germany advantageous (Berlin/Frankfurt area ideal)

#### We Offer:

- Unique set-up as we give our colleagues the opportunity to work from their preferred environment (including home-office and / or co-work environments). We jointly bring our services to the client
- Modern working environment with the infrastructure to work decentrally
- Entrepreneurial environment / no hierarchies with the potential for partnership
- International / global projects
- Competitive compensation with solid mix of base and variable salary components

Clients drive when – where – how we work. We care about quality, commitment to the needs of our clients, creativity, sense for good transactions, analytical skills and ability to efficiently manage a process to a successful conclusion.
